SUMMARY

Android Developer passionate about programming, continuous learning, and tackling new challenges that drive personal and professional growth. I believe in the power of innovation and collaboration to create impactful solutions. In 2020, I had the honor of winning the Tourism Cluster category at HackinRio as part of the dynamic Squad Area 51. Over the years, I've contributed to a variety of software solutions for different companies, focusing on entrepreneurial capacity-building and delivering tangible results that enhanced business performance. Let's connect and build meaningful, high-impact technology together!

EXPERIENCE

Android Developer (Mid-Senior)

TriVisionSky

December 2024 - Present, Amazonas, Brazil

- Co-Founder and Lead Android Developer at TriVisionSky, where I lead the architecture and development of a scalable, cross-platform ticketing solution for the river transport market. I bring over 5 years of hands-on experience in building and optimizing mobile applications, with strong expertise in Kotlin, Jetpack Compose, and modern Android architecture (MVVM, Clean Architecture, KMP). I drive the entire development lifecycle—from code to production—while also leading daily stand-ups, managing task prioritization using agile practices, and aligning product features with business goals. Passionate about creating impactful, user-focused technology, also delivered custom tech solutions for multiple companies, empowering their entrepreneurial capacity and achieving measurable business results. Constantly learning, adapting, and building for growth.

Android Developer (Junior- Mid)

Enterprise Intituto Atlantico

May 2021 - November 2024, Remote.

- Developed and maintained scalable Android applications for the international market using Kotlin, Jetpack Compose, and the MVVM architectural pattern.
- Collaborated with global cross-functional teams, participated in code reviews, and led daily meetings using agile methodologies such as Scrum and Kanban.
- Conducted research and development of technical solutions tailored for international companies, contributing to innovation and competitive advantage.
- Implemented modular and reusable architectures, including Clean Architecture, to ensure long-term maintainability and code quality.

Android Developer (Freelancer)

Freelancer

January 2021 - January 2023, Remote.

- Engineered Android applications using Kotlin, Java, Firebase, RESTful APIs, and MVVM architecture to ensure performance and reliability.
- Focused on performance optimization, intuitive user experiences, and delivering custom solutions tailored to client needs.
- Collaborated directly with clients to gather requirements, troubleshoot issues, and deliver solutions on time and within scope.
- Proactively resolved project-related challenges while providing ongoing support and strategic guidance to clients.

Android Developer (Intern- Junior)

Enterprise AtlasTech

January 2020 - May 2021, Cidade RJ.

- Contributed to the maintenance and development of new features for e-commerce applications, enhancing performance and user experience.
- Utilized Firebase, Retrofit, and Room to manage data storage, synchronization, and server communication efficiently.
- Supported the development of Android applications across multiple sectors, including e-commerce and fintech, using Kotlin and the MVVM architectural pattern.

I.T Support

Enterprise I.E.N.S.F

February 2018 - January 2020, City RJ.

- Performed preventive and corrective maintenance on systems and computers to ensure operational stability and minimize downtime.
- Administered local networks, managing configuration, monitoring performance, and resolving connectivity issues.
- Configured and secured machines, applying best practices for system protection and data integrity.
